

SIURALTA
ROUGE
VINSNUS

If we try to classify wines by categories, SiurAlta Rouge would fit into the “blush” wines, for its bright carmine and its drinkability. It would also take part in the cheerful character of the “vins de soif”, with its combined balance of citrics and bitters. Rouge brings together two vineyards of the same altitude, confronted visually on both sides of the valley: Camí del Montsant on the East and Gritella on the West; the percentage of each vineyard that is used varies according to each vintage.
